CD86, p. 558 Miguel Cruz, Leopoldo Ramos Ducos, Ana Maria del Valle, Frank Chavez

Have we any reason to believe this Cruz is the same one of similar name in the Oswald bust?

There is no identification of Ramos Ducos, his office, or any explanation why she should have gone to his office and made such a statement.

There is a Ramos (phon) who figures in the Dallas Odio story, but there is no reason to connect that person or his wife with Puerto Rico and no reason to believe this is the same person. I merely note the name similarity, there seeming to be two such in this entirely inadequate report.

With the claim to credit for killing Kennedy, is it not inconceivable that nothing was done with this?
